Caleb Jay Rogers
Software Engineer
San Francisco, CA
734-224-3732

Technical Skills

Strong
- Javascript, ES6 / ECMAScript 6, jQuery, Angular, Node, Express, Underscore, HTML, CSS

Experienced
- TDD, Git, D3, SocketIO, React, Mocha, Chai, Jasmine, Karma, MySQL, SQLite, Postgresql, MongoDB, Mongoose, Backbone, Bookstrap, Handlebars, JSX, Coffeescript, C, PHP, Java, Soundcloud API, Reddit API, Google Cloud, Heroku, Python, Twitter API, Grunt, Gulp

Projects

LangBattle
langbattle.herokuapp.com

Full Stack Software Engineer
Language learning tool leveraging human competitiveness to enable effective language retention
- Composed Angular front-end for modularity and extendability of language battle game modes
- Arranged Node and Express backend for flexibility and modularity between database and game controllers
- Built Postgresql database for compatibility with Heroku and ease of importing CSVs
- Integrated Socket.io for real-time game eventing and communication between clients

Gitnalysis
gitnalysis.herokuapp.com

Full Stack Software Engineer / Scrum Master
Github analysis software enabling enabling intelligent presentation of repos alongside predictive issue analysis
- Constructed React / Redux front-end to allow for rapid asynchronous updates across a modular view
- Integrated Google Predict machine learning API to sort Github issues by difficulty
- Bundled packages and streamlined deployment with Webpack
- Managed Git workflow and pull request guidelines among a team of four engineers

Caffiend
caffiend.herokuapp.com

Full Stack Software Engineer / Product Owner
App enabling rating and viewing of user-generated cafe menu items
- Conceived and actualized Angular front-end for responsive client/server data binding
- Framed server-side routing in Node and Express resulting in a RESTful back-end and simple SQLite3 querying
- Crafted custom CSS stylesheets to ensure consistent and production-ready UI/UX
- Utilized Trello to delegate and compartmentalize tasks across remote team of four engineers

Professional Experience

Makersquare
2016

Software Engineer
Top software engineering immersive in San Francisco, New York, Austin, and Los Angeles
- Consulted 50 new software engineers in industry best practices for web development
- Collaborated with team on open source software and web applications

NES Global Talent
2014-2015

Recruitment Consultant
Industry-leading int'l oil and gas recruiting agency, clients including Shell, Exxon, BP, Chevron
- Overcame 60% oil recession by placing 4 engineers and generating $100k USD revenue
- Assisted in over 5 placements by querying CRM database and organizing data in Excel for strategic analysis

Brilliant Int'l Group
2014

Project Manager
Exclusive publisher for Disney in Taiwan
- Broached agreement between Chinese and Japanese speakers to acquire several new clients
- Translated and designed Chinese website to English using HTML and CSS

AIESEC Taiwan
2013-2014

Vice President, Incoming Exchange
UNESCO recognized global non-profit specializing in int'l exchange of students on internships
- Increased total internship opportunities from 4 to 50 in 6 months by implementing effective sales methods
- Trained and mentored 150+ sales managers and students in sales, leadership, and business development
- Collaborated with the Vice President of Taiwan and other government officials to ensure vitality of AIESEC visa program

Education

Makersquare	Advanced Software Engineering Immersive	2016
Harvard	CS50x Introduction to Computer Science Course	2015
University of Houston	B.A. Creative Writing, Minor in Anthropology	2013

Personal

I drove a motorcycle across Vietnam, speak Mandarin Chinese and Japanese, and have unsuccessfully searched across fifteen states and six countries for someone that can bake a better chocolate chip cookie than me.
